**USER / INSTALLER RESPONSIBILITIES**

This certificate does not automatically constitute authority to install the item(s).

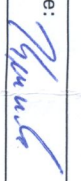

Where the user/installer performs work in accordance with regulations of an airworthiness authority different than the airworthiness authority specified in block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts items from the airworthiness authority specified in block 1.

Statements in blocks 13a and 14a do not constitute installation certification. In all cases aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

Findings: <b>The upper half of the display content was mirrored into the lower half of the display. Further the blower made strange noise, because of pollution of the entire FAP. For repair the basis-kit PNR: 7001 240 08012, SNR: 710191000288 must be replaced. Note: We noticed some signs of wear on the front cover that have no effect on the function of the FAP.</b>
