User/Installer Responsibilities							
It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article. Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1. Statements in Blocks 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.							

Certified True Copy Statement

Kapco Global certifies that the attached document is a copy of FAA Form 8130-3. The original FAA Form 8130-3 received by our facility is maintained on file pursuant to our document retention standards. The original FAA form tracking number is 11620. The new tracking number for this portion of the split shipment is 4691167-00. The number of products or articles being shipped under this approval is 2.

A handwritten signature in black ink, appearing to read "Gary DePhillips".
