### User/Installer Responsibilities

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1.

Statement in Blocks 13a and 14a do not constitute installation certification. In all cases aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

Work Scope : RP  
Qty : 1

### Service Performed :

#### SYMPTOM- PRELIMINARY

Unit was visually inspected and exhibits wear and tear typical of in service condition.  
**FAULT-REPAIR**

Unit passed pre-testing but does exhibit in service wear on exterior surfaces which will require rework/repair.

#### ACTION-REPAIR

New exterior surface coatings were applied, electrical/mechanical connectors inspected/repared as required. Unit was retested IAW CAM-5366 and found to meet all applicable test criteria.
