1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete them.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress regularly to ensure that the project is on track.

5. Finally, the fifth step is to evaluate the results of the project. This involves assessing the outcomes against the objectives and goals to determine the effectiveness of the intervention.

After printing this label:

1. Fold the printed page along the horizontal line.
2. Place label in shipping pouch and affix it to your shipment.

1	SPOILER MIXER ASSEMBLY	251A1741-5	1	E0448	REPAIRED

12. Remarks:

The component identified above was **REPAIRED** in accordance with Federal Aviation Regulation and is approved for return to service with respect to the work performed. Pertinent details of the work accomplished are on the file at this agency under Form Tracking Number identified above.
Removed from A/C: D-ABKA
S/B and A/D: None Applicable.
OEM CMM: 27-67-04, Revision#: 27, Revision Date: 11/1/2022

ORIGINAL

Certifies work specified in blocks 11/12 was carried out in accordance with EASA part 145, and with respect to that work, the component is considered ready for release to service under EASA part 145 Approval Number EASA 145-6467

13a. Certifies the items identified above were manufactured in conformity to:

- ☒ Approved design data and are in a condition for safe operation.
☒ Non-approved design data specified in Block 12

14a. ☒ 14 CFR 43.9 Return to Service ☒ Other regulation specified in Block 12
Certifies that unless otherwise specified in Block 12, the work identified in Block 11 and described in Block 12 was accomplished in accordance with Title 14, Code of Federal Regulations, part 43 and in respect to that work, the items are approved for return to service.

User/Installer Responsibilities

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1.
Statement in Blocks 13a and 14a do not constitute installation certification. In all cases aircraft maintenance records must contain an installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

RECEIVING INSPECTION

P/N and S/N verified on unit and customer RO. No external damage noted. See RO for work scope. Technician must verify

PRELIMINARY INSPECTION

P/N 251A1741-5 verified IAW technical data referenced above.

S/N E0448 verified through ID plate and customer RO.

Unit received in poor condition. Unit failed visual examination upon arrival. Corrosion present on unit exterior.

No AD's applicable for unit at this time.

TSN: UNK CSN: UNK

TSO: UNK CSO: UNK

Tech: D.T. #116

HIDDEN DAMAGE

None noted.

Tech: D.T. #116

INITIAL FINDINGS

Unit failed functional test IAW technical data referenced above.

Reason: Turning Torque out of limits.

Customer Complaint: N/A.

Tech: D.T. #116

TEARDOWN FINDINGS

Unit partially disassembled, cleaned and inspected IAW technical data referenced above. Unit requires replacement of all fasteners removed during disassembly. Several bearings require replacement as a result of rough operation. Minor nicks, scratches, and dents do not affect fit, form, or function of the unit.

Unit will be repaired.

Tech: D.T. #116

CORRECTIVE ACTION

Replaced all parts and corrected all findings listed in Teardown report. Unit was repaired and tested IAW technical data referenced above.
